11. Push the commit to remote repository.

12. Specify the URL and click OK.

13. Click on Push.

14. Watch the content being pushed to remote repository.

The screenshot shows a web browser window with multiple tabs. The active tab is the GitHub repository page for 'prakaram / gitintdemo'. The URL in the address bar is 'https://github.com/prakaram/gitintdemo'. The page features a dark header with navigation links: 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. A pink warning banner at the top states: 'The password you provided is weak and can be easily guessed. To increase your security, please change your password as soon as possible. Read our documentation on safer password practices.'

Below the banner, the repository name 'prakaram / gitintdemo' is displayed, along with statistics: 'Unwatch 1', 'Star 0', and 'Fork 0'. The 'Code' tab is selected, showing a 'No description, website, or topics provided.' message and an 'Edit' button. The 'Manage topics' section is empty.

The commit history section shows '1 commit', '1 branch', '0 releases', and '1 contributor'. A dropdown menu shows 'Branch: master' and a 'New pull request' button. Action buttons include 'Create new file', 'Upload files', 'Find file', and 'Clone or download'. The commit list shows a single commit by 'prakaram' with the message 'Initial Commit' and a timestamp of '4 minutes ago'. The commit details show a tree structure with files: '.idea', 'src', and 'helloproject.iml', all marked as 'Initial Commit'.

At the bottom, there is a blue box with the text 'Help people interested in this repository understand your project by adding a README.' and a green 'Add a README' button. The Windows taskbar at the bottom shows the search bar and various application icons, with the system clock indicating 10:30 PM on 2/26/2019.
