

1. Launch Git GUI application. Create New Repository.

2. Create a new folder and select the same for creating New Repository.

3. Click "Create" to Create New Repository.

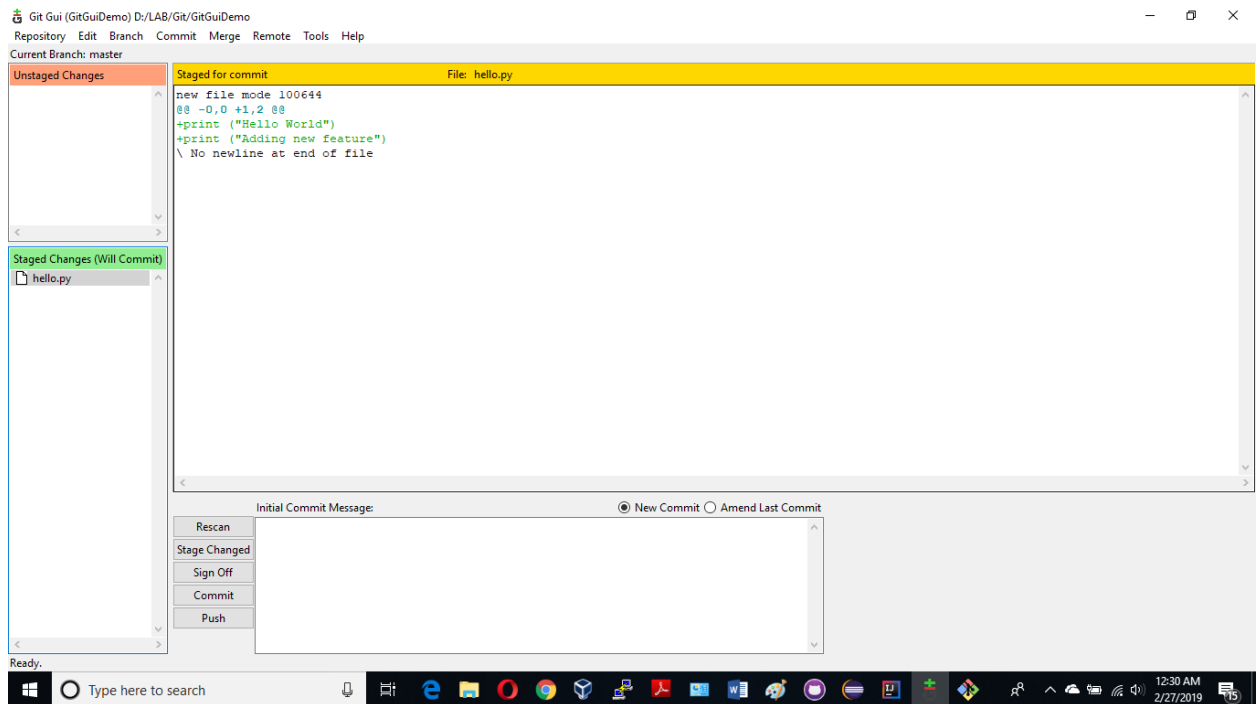

4. A file hello.py is added to the folder. Now this need to be staged.

5. Stage the changes before commit.

6. Staged to commit.

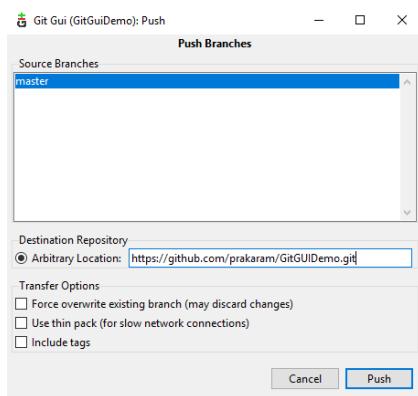

7. Provide commit message and commit.

8. To be pushed to remote repository. Click on Remote > Push.

9. Specify the URL of remote repository. Click on Push.

Click on Close.

10. Watch the contents pushed to remote repository.

The screenshot shows a web browser window displaying the GitHub repository page for 'prakaram / GitGUIDemo'. The browser's address bar shows the URL 'https://github.com/prakaram/GitGUIDemo'. The repository page includes a search bar, navigation links for 'Pull requests', 'Issues', 'Marketplace', and 'Explore', and a notification banner about password security. The repository details show 1 commit, 1 branch, 0 releases, and 1 contributor. A table lists the commit history, showing an initial commit by 'prakaram' and a file 'hello.py' added 4 minutes ago. A button 'Add a README' is visible at the bottom of the commit list.
